人机交互实验课作业 0

1. Quick Usability Test （9.10 日实验课）

Team up with another student in the class （每队两人）

Choose an existing application or system that you can access in class, on your phone or laptop (anything you like)

Imagine two simple and most typical uses of the system

Perform a simple “usability evaluation”

- Step through each of your tasks
- One person uses the system, the other takes notes; switch roles for the second task
- Note problems the user had
- Note anything a new user might not know how to do
- Also consider efficiency

Also think about the goal of the product, what value does it provide?

注意：

0，需要将上述实验结果整理为一个 PDF 文档，按姓名 1-学号 1-姓名 2-学号 2-UsabilityTest.pdf 的方式提交， ddl 下周 9. 17 号 24:00

1，本次课的两人队和之后正式实验课没有关系，本次组队只是面向本次 0 号实验课。

2，具体实验报告提交方式，由助教同学通知。
